

City of Belmont Capital Infrastructure Fact Sheet

Streets

The City's street infrastructure includes approximately 70 centerline miles (140 travel lane miles) of street pavement, as well as traffic signals, street lighting, pedestrian and bicycle facilities, street signs and retaining walls.

The City's street pavement has an average rating of "at risk" by the Metropolitan Transportation Commission (MTC), which means that the average street in Belmont is worn to the point of needing major rehabilitation or reconstruction. In March 2016, MTC rated Belmont's streets worst in the County and near the bottom for the entire San Francisco Bay Area.

The cost of bringing the average rating of City streets to a rating of "good", as well as addressing other right-of-way related facility replacement needs, are noted on the following page.

Beginning in FY2018, the Governor authorized the Road Maintenance and Rehabilitation Account (RMRA) Fund to provide \$15 billion for local streets and roads over the next ten years, of which Belmont is expected to receive \$6.37 million. Additionally, Council initially determined to allocate a minimum of \$1,000,000 (or 80%) in Measure I resources towards the Street Repair and Related Improvement Program.

Remaining Gas Tax revenues are insufficient and the City's General Fund remains at risk from unanticipated failures and emergency response.
